### **Four Companies Combine to Offer Aquatic Products and Services**

*Collaborative program provides numerous resources for aquatic managers*

PHOENIX, AZ (February 12, 2009) – NovaSource®, Phoenix Environmental Care, LLC, AECOM Environment and SpecTIR, LLC, announce the formation of a new aquatic weed management service program and website designed to provide the aquatic weed management industry with an array of services and products.

The program, called Clear Aquatic Solutions™ (CAS), serves as a resource platform for aquatic managers to access tools for controlling aquatic weeds and maintaining aquatic habitats. The program includes mapping services, technical and regulatory consultation services, educational programs, a range of aquatic habitat diagnostic tools and a portfolio of aquatic herbicides to control noxious aquatic weeds.

According to Mike DeRiso, director of marketing and business development for NovaSource, the CAS program is a comprehensive, one-stop resource of information, products and services that are essential for the proper maintenance of aquatic environments.

"NovaSource developed Clear Aquatic Solutions as an innovative way to provide services to aquatic managers in support of our fluridone-based aquatic herbicide, WhiteCap® SC. CAS service providers have a wealth of knowledge and experience in the aquatic management field and Clear Aquatic Solutions provides aquatic managers direct access to these experts," DeRiso says.

CAS can help aquatic managers customize aquatic vegetation control programs to the specific conditions of their aquatic habitat and consistent with their management goals. For more information on Clear Aquatic Solutions, including a list of products and services and the companies that provide them, visit [www.clearaquaticsolutions.com](http://www.clearaquaticsolutions.com).

NovaSource is a business unit of Tessenlo Kerley, Inc. that is charged with developing and marketing registered pesticides for niche crop protection and specialty markets ([www.novasource.com](http://www.novasource.com)).

Phoenix Environmental Care, LLC is a company that has earned a reputation for developing a new distinctive class of high-performing products by enhancing the properties of post patent formulations ([www.phoenixenvcare.com](http://www.phoenixenvcare.com))

AECOM Environment is a global provider of professional, technical and management services to support all aspects of aquatic management from planning to conducting pond or lake vegetation management programs ([www.enser.aecome/marketandservices/47/40/index.html](http://www.enser.aecome/marketandservices/47/40/index.html)).

SpecTIR, LLC is a firm that specializes in harnessing the power of airborne hyperspectral remote sensing for collecting and analyzing large-scale geographical information, including water quality, in a cost-effective manner ([www.spectir.com](http://www.spectir.com)).
